

# Take Home Care Instructions

## For Declawing

1. Please use shredded paper or Yesterday's News cat litter in the littebox for the next 7-10 days.
2. Your cat may favor his/her paws for up to 2 months after their surgery. If there are any problems after that amount of time, please give our office a call.
3. If there are any signs of redness, swelling or discharge, please give our office a call at (717)264-2615
4. DO NOT allow animal to lick or chew at it's paws. If your animal continues to try and lick at the incision site, an Elizabethan Collar may be purchased.
5. Spot bleeding is normal for the first 24-48 hours.
